Accounts payable (AP) is money owed by a business to its suppliers shown as a liability on a company's balance sheet. It is distinct from notes payable liabilities, which are debts created by formal legal instrument documents. An accounts payable is recorded in the Account Payable sub-ledger at the time an invoice is vouched for payment.

Architecture Overview. LoadRunner works by creating virtual users who take the place of real users operating client software, such as Internet Explorer sending requests using the HTTP protocol to IIS or Apache web servers. Requests from many virtual user clients are generated by "Load Generators" in order to create a load on various servers under test
