MOTION Chapter 10 . Section 1 "Measuring Motion Key Term Motion Displacement Speed Velocity. Section 1 "Measuring Motion Observing Motion To actually observe and object in motion, you must observe the object in relation to another object that stays in place. The stationary object is a reference point or reference frame. How do we know that an object is in motion? When the object changes ...

Chapter 10: Forces. The Nature of Force Force. In science, the word force has a simple and specific meaning. Force is a push or a pull; When one object pushes or pulls another object, you say that the first object exerts a force on the second object. Force is a vector quantity. Described by magnitude and direction. An arrow represents the direction and strength of a force and the longer the ...

The Nature of Force Key Concepts How is a force described? How do balanced and unbalanced forces affect an objectâ€™s velocity? A force is a push or a pull. A force is described by its magnitude and by the direction in which it acts. The strength of a force is measured using the SI unit called the newton, named for Isaac Newton, an English mathematician. Picking up a small lemon requires you ...
