For video material relating to movement disorders, please go to Movement Disorders Videos.Less is known of the function of the cerebellum, thalamus and basal ganglia than of other structures in the brain, but there is an increasing appreciation of their complex role in motor and nonmotor functions of the entire nervous system.

Subcortical structures: the cerebellum, basal ganglia, and

Measles is a systemic infection. The primary site of infection is the respiratory epithelium of the nasopharynx. Two to three days after invasion and replication in the respiratory epithelium and regional lymph nodes, a primary viremia occurs with subsequent infection of the reticuloendothelial system.
