Humidity sensors are commonplace, relatively inexpensive, and come in many different varieties. Too often, we check the datasheet, use them with an interface, and (as long as the values "look reasonable") we accept the results.

### **How to Check and Calibrate a Humidity Sensor**

Big data's big promises are left in a big dust pile because we don't optimize the last mile: Data presentation. Learn from eight real-world examples how-to.

### **7 Data Presentation Tips: Think, Focus, Simplify**

Nuclear weapon designs are physical, chemical, and engineering arrangements that cause the physics package of a nuclear weapon to detonate. There are three existing basic design types. In many existing designs, the explosive energy of deployed devices is derived primarily from nuclear fission, not fusion. (This includes fission of any U-238 tamper or casing due to fusion produced neutrons.)

The Allam cycle is a novel CO<sub>2</sub>, oxy-fuel power cycle that utilizes hydrocarbon fuels while inherently capturing approximately 100% of atmospheric emissions, including nearly all CO<sub>2</sub> emissions at a cost of electricity that is highly competitive with the best available energy production systems that do not employ CO<sub>2</sub> capture. The proprietary system achieves these results through a semi-closed ...

The ability of the Treasury yield curve to predict future recessions has recently received a great deal of public attention. An inversion of the yield curve "when short-term interest rates are higher than long-term rates" has been a reliable predictor of recessions.
