Aptitude Questions With Answers for Time & Distance Problems 1)A train covers a distance in 50 min ,if it runs at a speed of 48kmph on an average.The speed at which the train must run

### **Aptitude Questions With Answers for Time & Distance Problems**

In math, distance, rate, and time are three important concepts you can use to solve many problems if you know the formula. Distance is the length of space traveled by a moving object or the length measured between two points. It is usually denoted by  $d$  in math problems. The rate is the speed at which an object or person travels.
