

## **document management system project pdf**

A document management system (DMS) is a system (based on computer programs in the case of the management of digital documents) used to track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users (history tracking). The term has some overlap with the concepts of content management systems.

There are people who personally prefer chaotic work stations, insisting that chaos fuel their creativity. While that may be true, it hardly works in a business environment where people are usually equipped with the right productivity tools to do the right jobs. This article tackles the benefits of managing your business documents through document management software.
