

personality a psychological interpretation pdf

A personality test is a method of assessing human personality constructs. Most personality assessment instruments (despite being loosely referred to as "personality tests") are in fact introspective (i.e., subjective) self-report questionnaire (Q-data) measures or reports from life records (L-data) such as rating scales. Attempts to construct actual performance tests of personality have been ...

Personality test - Wikipedia

Personality type refers to the psychological classification of different types of individuals. Personality types are sometimes distinguished from personality traits, with the latter embodying a smaller grouping of behavioral tendencies. Types are sometimes said to involve qualitative differences between people, whereas traits might be construed as quantitative differences.

Personality Tests: A selection procedure measure the personality characteristics of applicants that are related to future job performance. Personality tests typically measure one or more of five personality dimensions: extroversion, emotional stability, agreeableness, conscientiousness, and openness to experience.
