

reliability and statistics in pdf

Reliability does not imply validity. That is, a reliable measure that is measuring something consistently is not necessarily measuring what you want to be measured.

Reliability (statistics) - Wikipedia

In statistics, inter-rater reliability (also called by various similar names, such as inter-rater agreement, inter-rater concordance, interobserver reliability, and so on) is the degree of agreement among raters. It is a score of how much homogeneity, or consensus, there is in the ratings given by various judges. In contrast, intra-rater reliability is a score of the consistency in ratings given ...

Inter-rater reliability - Wikipedia

The intraclass correlation (ICC) assesses the reliability of ratings by comparing the variability of different ratings of the same subject to the total variation across all ratings and all subjects. The ratings are quantitative. We illustrate the technique applied to Likert scales via the following ...

Alpha Reliability Sport psychologists often produce a variable by effectively averaging the scores of two or more items from a multi-item questionnaire or inventory. The alpha reliability of the variable is derived by assuming each item represents a retest of a single item. For example, if there are five items, it's as if the five scores are the retest scores for one item.
