In economics, an optimum currency area (OCA), also known as an optimal currency region (OCR), is a geographical region in which it would maximize economic efficiency to have the entire region share a single currency.. The underlying theory describes the optimal characteristics for the merger of currencies or the creation of a new currency. The theory is used often to argue whether or not a ...

In economics, the 'J curve' is the time path of a country's trade balance following a devaluation or depreciation of its currency, under a certain set of assumptions. A devalued currency means imports are more expensive, and on the assumption that the volumes of imports and exports change little at first, this causes a fall in the current account (a bigger deficit or smaller surplus).

NOTES: Names in lowercase are those which Roger Mansell personally added as they were not found listed in the National Archives database. Most of Mansell's additions were later added to the ADBC Collection; see NARA's very helpful PDF file for explanation of this work (2008), including meanings of codes used for ranks, units, etc.; For CAMP CODE general area designations, see below.
