BUILDINGS BULLETIN 2017-014 - Technical

A fire sprinkler or sprinkler head is the component of a fire sprinkler system that discharges water when the effects of a fire have been detected, such as when a predetermined temperature has been exceeded. Fire sprinklers are extensively used worldwide, with over 40 million sprinkler heads fitted each year. In buildings protected by properly designed and maintained fire sprinklers, over 99% ...

An optical beam smoke detector is a device that uses a projected beam of light to detect smoke across large

areas, typically as an indicator of fire. They are used to detect fires in buildings where standard point smoke detectors would either be uneconomical or restricted for use by the height of the building. Optical beam smoke detectors are often installed in warehouses as a cost effective ...

Abstract. The U.S. Nuclear Regulatory Commission (NRC) has developed quantitative methods, known as "Fire Dynamics Tools" (FDT s), for analyzing the impact of fire and fire protection systems in nuclear power plants (NPPs). These methods have been implemented in spreadsheets and taught at the NRC's quarterly regional inspector workshops.

NUREG-1805, Supplement 1, Volumes 1 & 2 - NRC: Home Page

Front Matter (Title Page, TOC and Preface) Sample pages. This Guide is the result of a collaborative effort by the Society of Fire Protection Engineers (SFPE) and International Code Council (ICC) to address the complex fire protection challenges of very tall buildings.

Engineering Guide: Fire Safety for Very Tall Buildings

Introduction. This paper discusses a case study undertaken on an underground car park building of approximately 30,000 m². This paper focuses on the sprinkler delay which is typical of many geometric arrangements.

Impact of jet fan ventilation systems on sprinkler activation

The last post in this series, Incipient Fires: Key Fire Behavior Indicators reviewed stages of fire development (i.e., incipient, growth, fully developed, and decay), burning regimes (i.e., fuel and ventilation controlled) and identified key indicators used to recognize incipient stage fires. This post examines key indicators to identify growth stage fires and their burning regime.
