“ Many large hydropower reservoirs are designed with a huge dead storage which may be filled in some years or decades: flushing may be inefficient or unacceptable but the cost of dredging millions m<sup>3</sup>/year may be acceptable if the dredging equipment is designed according to local facilities including fine materials, calm water, electric energy, and paid for along decades of operations.

### **Dams With Significant Siltation Problems - Dam Engineering**

The emergence of silt-conscious design of hydro power plants is an engineering challenge which calls for pooling the experience of all concerned. It also underlines the desirability ... – Dimension and approach to encounter silting problems 5. Design Criteria – Hydraulic and mechanical design criteria for de-silting chambers.
